

[AFTERWORK]

Smartphones, tablets, voice assistants...
DEVICES, THE WEAK LINK
IN ACHIEVING OPEN INTERNET ACCESS

15 February 2018, starting at 3:00 pm,
PAN PIPER
2-4 Impasse Lamier, Paris 11ème

Having kicked off an investigation into the influence that devices have over open internet access, Arcep began a series of meetings and workshops with stakeholders: equipment suppliers, developers, content providers, etc. Today it is publishing the results of this work, and is inviting the sector's experts to discuss its views and findings.

Opening remarks |

- Sébastien Soriano, Chairman of Arcep 3:00
